

A **lethal** dose  
of fentanyl!

## SIGNS OF AN OVERDOSE

Recognizing the signs of opioid  
overdose can save a life!

- Small, constricted pupils
- Falling asleep or losing consciousness
- Slow, weak or no breathing
- Choking or gurgling sounds
- Limp body
- Cold, clammy and/or discolored skin

## NARCAN (NALOXONE)

If administered in time,  
Naloxone can help save  
a life from an opioid  
overdose.

# FENTANYL

WHAT EVERYONE NEEDS TO KNOW

**Goodfellas** **TANGO & CASH**  
**Friend** **JACKPOT** **MURDER**  
**Apache** **Dance Fever**

*"No matter what it's called, Fentanyl  
is killing our kids." - Sheriff Cutler*

# WHAT IS FENTANYL?

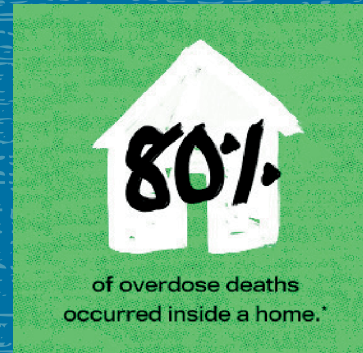

Fentanyl is a synthetic opioid that is up to 50 times stronger than heroin and 100 times stronger than morphine. It is a major contributor to fatal and nonfatal overdoses in the United States.

Many teens and young adults experiment with drugs but aren't necessarily addicted. But just one pill or some powder laced with Fentanyl can lead to dire consequences. Too often, they don't know the pill or powder contains Fentanyl.

*More than 150 people die each day from overdoses related to synthetic opioids like Fentanyl*

**6** OUT OF EVERY **10** PILLS  
WITH FENTANYL CONTAIN A POTENTIALLY  
**LETHAL DOSE**

*"Noah knows better..."*  
*"He's too smart..."*  
*"We talk about drugs..."*

These are quotes Janel Rodriguez and Brandon Dunn said before their son, Noah, tragically passed away from a fentanyl poisoning. Noah was a great kid who made a bad choice. After taking what he thought was a Percocet, he was found to have more than 8.5 milligrams of fentanyl in his system. Please visit [forever15project.org](http://forever15project.org) for more on their story.

Our advice? Have honest conversations with your loved ones at a young age. Monitor their social media and electronic device usage.

## DRUG DEALERS ARE TARGETING CHILDREN

Opioids are a major problem in our country and right here in Hays County. As if that wasn't difficult enough, drug dealers are now peddling colorful pills laced with Fentanyl and targeting younger children. Because of those bright colors, many children may not realize they are taking dangerous, even lethal drugs.

Some call these "rainbow candy" and innocent children are in danger. What can we do as a community?

- Offer drug addiction resources
- Discuss the dangers of drugs with children & young adults
- Provide resources for law enforcement
- Make Narcan available through EMS, law enforcement, schools and public buildings
- Keep the lines of communication open
